PROFESSIONAL SUMMARY

Senior Salesforce Developer with 3.5+ years of experience designing and delivering enterprise Salesforce solutions. Expertise in Apex, LWC, Flows, Integrations, Salesforce Loyalty Management, and Identity Management (OAuth/SSO). Experienced in large-scale deployments, system optimization, and building scalable, maintainable applications.

CERTIFICATIONS

Platform Developer I · Administrator · Service Cloud Consultant · Agentforce Specialist · AI Associate · AWS Cloud Practitioner

TECHNICAL SKILLS

Core Development: Apex (Batch, Queueable, Future), LWC, Triggers, Flows, SOQL/SOSL, Platform Events

Architecture: OOP, Design Patterns (Strategy, Selector/Domain/Service layers), Data Modeling, Security Architecture

Salesforce Platform: Loyalty Management, DPE (BatchCalcJobDefinition), FSL, Experience Cloud, Einstein Bot, Agentforce, OMS

Integrations: REST/SOAP APIs, SSO (SAML/OAuth), WhatsApp Business API, JSON Processing, Platform Events

Admin & Security: Profiles, Permission Sets, OWD, Role Hierarchy, Sharing Rules, Custom Metadata Types

Tools: Git, VS Code, Postman, Salesforce CLI, Workbench, Data Loader, JIRA

PROFESSIONAL EXPERIENCE

Senior Salesforce Developer | [OSF Digital](#)

Sep 2025 – Present

Summit-Level Salesforce Partner · Loyalty Management · Golf Transformation Project · FSL Spain & Portugal Expansion

- Architected end-to-end Loyalty tier management (upgrades, downgrades, annual resets) using Strategy Pattern with CMTD-driven config, eliminating hardcoded business logic across 10K+ member records
- Engineered DPE (BatchCalcJobDefinition) solutions for qualifying points calculation and tier transition workflows, reducing developer effort by 30% and enabling admin-driven logic updates
- Built AnnualTierDowngradeBatch chained with QualifyingPointsResetBatch, ensuring transactional consistency and clean separation of concerns across batch execution cycles
- Executed concurrency-safe Apex using SELECT FOR UPDATE row-locking to prevent race conditions in high-volume loyalty processing
- Designed least-privilege security architecture (Profiles, Permission Sets, Sharing Rules) for secure multi-business unit access across UK, Spain, and Portugal orgs
- Engineered enterprise-scale data migration using Batch Apex with custom transformation logic, processing 1M+ records with zero data loss
- Built automated User Access Provisioning (UAP) flows using Flow + Apex, reducing manual admin effort by 35%
- Led FSL configuration and deployment for Spain/Portugal expansion, extending the UKI solution with locale-specific customizations and validation rules

Salesforce Developer | [Wipro Technologies](#)

Mar 2023 – Aug 2025

Client: The Times of India (BCCL) · LWC · Apex · SSO · Experience Cloud · WhatsApp API · Einstein Bot

- Developed scalable notification framework (SMS, WhatsApp, Email) with retry logic serving 100K+ users, reducing message failure rate by 18%
- Led domain migration and SSO (SAML) implementation for customer portal with zero service disruption; configured OAuth flows for API authentication
- Integrated WhatsApp Business API for re-engagement campaigns using Platform Events and outbound REST calls, increasing subscription renewal rate by 28%
- Built Einstein AI chatbot on Experience Cloud, improving customer response time by 40% and achieving 90% CSAT score
- Automated 10+ business processes with Apex and Flows, reducing manual effort by 40% and eliminating data entry errors
- Optimized SOQL queries and data model, improving query performance by 20% and reducing storage consumption by 25%
- Delivered 15+ production features across 2+ years with zero downtime; received Best Performer award twice and multiple client appreciation awards

EDUCATION

B.Tech in Computer Science & Engineering

2018 – 2022
